Survey of State Criminal History Information Systems (2008, 10th Ed.)-Owen M. Greenspan 2010-08 This report is based upon the results from a survey conducted of the administrators of the State criminal history record repositories in March-June 2009. Fifty-six jurisdictions were surveyed. Responses were received from 53 jurisdictions. It presents a snapshot as of Dec. 31, 2008. In addition, the FBI was the source for some of the information relating to criminal history records, including State participation in the Interstate Identification Index (III) system (the national criminal records exchange system) and the number of III records maintained by the FBI on behalf of the States; the number of records in the protection order file; and the number of sex offender records in the FBI National Crime Information Center files. Charts and tables.

The Principles of Clinical Cytogenetics-Steven L. Gersen 2008-08-17 In the summer of 1989, one of us (SLG), along with his mentor, Dorothy Warbton, attended the Tenth International Workshop on Human Gene Mapping. The meeting was held at Yale University in celebration of the first such event, which also took place there. This meeting was not open to the general public; one had to have contributed to mapping a gene to be permitted to attend. The posters, of course, were therefore all related to gene mapping, and many were covered with pretty, colorful pictures of a novel, fluorescent application of an old technology, in situ hybridization. Walking through the room, Dorothy remarked that, because of this new FISH technique, chromosomes, which had become yesterday's news, were once again "back in style." Approximately three years later, a commercial genetics company launched a FISH assay for prenatal ploidy detection. A substantial number of cytogeneticists across the country reacted with a combination of outrage and panic. Many were concerned that physicians would be quick to adopt this newfangled upstart test and put us all on the unemployment line. They did not at the time realize what Dorothy instinctively already knew—that FISH would not spell the doom of the cytogenetics laboratory, but it would, rather, take it to new heights.

Investigations in Sex Estimation-Donna L. Harrison 2018-09-29
Investigations in Sex Estimation: A Comparison of Morphological and Metric Methods is a collective comparison of the many morphological and metric methods currently used on adult and juvenile human remains. This single comprehensive resource for sex estimation in skeletal material includes discussion on the evolution of sexual dimorphism in modern humans, how sexual dimorphism manifests itself in those bones, the growth development in juveniles and how sexual dimorphism can be measured in their bones. Data is presented which contradicts previously held postulates and some different uses of sex estimation methods are suggested, such as using the grading system to assess evolutionary change in skeletons or grouping juveniles into smaller groups by age to better estimate sex. New insights are offered for future research from the presentation of case studies on gender and a comparison of the sex differences between two African-American collections which suggests a correlation between occupation and evolutionary change. To achieve the objective, data on 294 adults from four diverse collections of known sex are obtained using a total of 67 morphological and metric methods. An additional 23 morphological and metric methods used on juveniles, aged 0 to 18, from two of the collections. The methods are specific to either the cranium, mandible, pelvis, humerus or femur. The compilation of assessment of sex provides definitive answers on which type of method, morphological or metric, is more accurate, which morphological and metric methods are the most accurate, and which bones are more reliable to estimate sex especially in the absence of a pelvis. Investigations in Sex Estimation is intended to be used in the field and the laboratory for the identification of sex in human remains and aims to provide a wealth of data for future research in sexual dimorphic studies. Provides the anthropological community with the results

of the first collective comparison of the many morphological and metric methods currently used on adults and juveniles Introduces methods, reviews sexual dimorphism, and shares new insights for future research Highly illustrated, using testing data from four very diverse skeletal collections

De-constructing Dahl-Laura Vinas Valle 2016-01-14 This is the first single-authored monograph on Roald Dahl since 1994. Remarkably, in spite of Dahl's commercial success, and the divided opinions he generates, very little scholarly work on the author has been produced. In the light of sociocultural constructivist theory, De-constructing Dahl focuses on the critical context, texts and paratexts that make up the packaging of "Dahl." It offers the first thorough overview of the criticism and the language employed to discuss Dahl since the 1970s, the difficulties that using such language entails, and how it still permeates current criticism. It delves into the relationship between Dahl's children's and adult fiction by drawing comparisons and contrasts and exploring the common traits and patterns that bring his whole work together. It also examines how Dahl constructed himself as a children's writer; how his publishing house and allies contribute to mediating and sustaining the Dahl public persona; the ways that marketing strategies are responsible for the identity of his books; and how editorial decisions about the age range, and, therefore, how the classification of a manuscript as a book for children or for adults constructs particular ideas of what "children's literature" is, and what is considered "appropriate" or "unsuitable" for children to read.

9781492557111-Hurd, Amy R. 2019 Leisure Services Management begins by presenting a firm foundation of competency-based management. Students will learn what management is, what the manager's role is, and how their work affects their agency and their customers. They will also explore specific management areas such as marketing, financial management, human resources, employee development, communication, and evaluation. Throughout the text, students will be encouraged to apply their own experiences to the concepts being discussed to deepen their understanding of the profession.

Inside the Mind of a Serial Multi-Paraphilic Sex Offender-Dr. R. Devin Beverly 2009-12-22 "Inside the Mind of a Serial, Multi-paraphilic Sex Offender" provides a very graphic, perspicacious, clinical analysis of an offender's life-long history of sexually deviant thoughts, fantasies, and conduct, and is a must for counselors, psychologists, social workers, therapists, prosecutors, investigators, judges, parents, and sex offender specialists alike. It provides an in-depth examination of a real offender's life that spanned decades, beginning at the early age of five. Dr. Beverly takes the reader on a journey through the mental, emotional, and behavioral character of one offender whose criminal and bizarre conduct remained undetected for years. This book is not intended to foster hate toward sexual offenders; rather, each reader has an opportunity to gain new knowledge towards prevention, recognition, and intervention.

Increasing Sex Equity-United States. National Advisory Council on Vocational Education 1981 This report focuses on a study that examined whether the implementation of the sex equity provision of the 1976 Vocational Education Amendments has resulted in equitable access to and benefit from the nation's vocational education system by women and men, girls and boys. The study focused on such issues as funding mechanisms; federal and state roles; local implementation; special needs of women; state sex equity coordinations; state plans, reports, and public hearings; administrators, counselors, and instructors; curricula and texts; and related legislation. Data in general showed that women have taken a greater part in vocational education, especially in sex-mixed programs, and less noticeably in non-traditional programs, than they did before the legislation was enacted. The report is organized in the following five sections by the major phases of the study: (1) an introduction to the issues involved and the methodology of the study; (2) an analysis of state reports and national and

state enrollment data; (3) an analysis of recent research studies conducted to identify the impact of vocational education on women and men; (4) a description of the two public hearings conducted for this study and a summary of the issues raised; and (5) appendixes which contain analyses of state reports and enrollment data, a matrix of the contents of state plans, and other details of the study. Marijuana Botany-Robert Connell Clarke 1981-06-15 Marijuana Botany presents the scientific knowledge and propagation techniques used to preserve and multiply vanishing Cannabis strains. Also included is information concerning Cannabis genetics and breeding used to begin plant improvement programs. The book presents scientific and horticultural principles, along with their practical applications, necessary for the breeding and propagation of Cannabis and in particular, marijuana. It will appeal not only to the professional researcher, but to the marijuana enthusiast or anyone with an eye to the future of Cannabis products.
